Jayashree Yajnesh

UX Designer

Tracy, CA | jayashree.yajnesh@gmail.com | (408)621-2581 | https://jayashree-ux.pages.dev/

Professional Summary

UX designer with 4+ years of web and mobile design experience and a focus on AI-assisted UX design. Combines AI-generated screen concepts with user flows and product requirements to develop low-fidelity wireframes and high-fidelity designs in Figma. Builds web interfaces with HTML and CSS.

Professional Experience

UX Design Consultant (Contract) | ITFrontDesk

Jan 2022 – Present

- Took designs from low-fidelity wireframes to high-fidelity mockups across AppointmentDesk, ReminderDesk, and ReservationDesk, then built clickable HTML prototypes to demonstrate how each workflow behaved.
- Partnered with developers during implementation to refine interactions and resolve UX issues as features were built.
- **AppointmentDesk** — Contributed to the UX of an appointment scheduler that lets customers book online and gives front-desk staff one calendar to check availability, book, and cancel appointments.
- **ReminderDesk** — Contributed to the UX of an automated reminder platform that sends appointment reminders by text, phone, and email, giving staff a way to handle routine reminders without placing each call manually.
- **ReservationDesk** — Contributed to the UX of a self-service event registration platform that lets attendees book available slots and helps staff manage capacity for each session.

Independent UX Projects

- **Smart Fitness Dashboard** — Designed a web dashboard that lets users review activity trends, track progress toward fitness goals, and manage connected devices in one place.
- **Voyago** — Designed a mobile trip-planning flow, from discovering destinations to planning a trip and revisiting upcoming itineraries.
- **HomeEase** — Designed the home services booking flow, from comparing provider profiles to booking, rescheduling, and tracking appointments.

Skills

UX and Interaction Design | User flows, navigation design, low-fidelity wireframes, high-fidelity mockups, web and mobile UI design

Figma and AI-Assisted Design | Figma, screen concept generation, layout exploration, design iteration

Front-End Prototyping | HTML, CSS, JavaScript, jQuery
